## 1. Release Overview

Bonzai version 2.2.2 release is a point release that fixes a few issues and provides an additional improvement to caching in Bonzai.

Release Version	2.2.2
Release Date	September 21, 2019
Deliverables	<ul style="list-style-type: none"><li>Release Notes</li><li>Bonzai Intranet Deployment Package</li></ul>

## 2. Summary of Issues Fixed

### 2.1 Issues Fixed in v2.2.2

Detailed below are the fixes in this release:

- Fixed an issue where external links — links configured to open in a new tab — inside the body of an Important Message would not do so when clicked. (BOINT-11445)
- News Rollup now has added filtering to ensure that only News Content Types are displayed in the Web Part. (BOINT-9663, BOINT-9492)
- The imported *event.ics* calendar file from an Event Page now generates the correct event time having proper time zone offset when opened in other time zones. (BOINT-8381)
- It is now possible to access a Document Portal search page having active refiners directly using its URL. This means that the URL can now be used as a “show more” link to a pre-filtered results page. (BOINT-9211)
- Fixed more German translations in Event pages and rollups. (BOINT-9009)
- Returned the visibility for Search Result Block titles, which were hidden as of Version 2.0.0. (BOINT-8561)
- Fixed an issue where overriding the Tile Colors for Advanced Links Web Part items would not reflect in Internet Explorer. (BOINT-8818)
- Fixed translations for the 5-day forecast day labels in Weather Widget. They will now display in the current authoring language of the Bonzai. (BOINT-8667)

### 3. Known Issues

- Known Issues identified in the 2.2.1 release notes, that are not included in the Fixed Issues list, still exist, and are either scheduled for an upcoming release, or actively being resolved.
- Due to the new caching introduced in version 2.2, users need to run a browser refresh (ctrl+f5) to obtain the latest cache for any changes to list views/settings.

### 4. System Requirements

Required software is noted below, with an emphasis on the following terms:

- **Certified** - this release was tested specifically against this configuration.
- **Supported** - this release was not tested against this specific configuration, though it remains supported as differences between it and the certified software are minimal or not applicable to Bonzai.

	Certified	Supported
Operating System	Windows Server 2016 with .NET Framework 4.5	Windows Server 2012 R2 with .NET Framework 4.5
SharePoint	SharePoint 2016 SharePoint Online	SharePoint 2013 w/ SP 1 or higher
Database	MS SQL 2016 Std	Bonzai supports the versions of Microsoft SQL that SharePoint supports ( <a href="#">SP2013</a>   <a href="#">SP2016</a> )
Web Browser	IE 11 Chrome 72.0.3626.121	

## 5. How to Install or Upgrade to this Release

Please contact [success@skyvera.com](mailto:success@skyvera.com) for more information on how we can help you to upgrade to this release.

The Bonzai team will deploy 2.2.2 to our CDN on September 21st.

**Customers running 2.2.0 and above will automatically be updated to 2.2.2 with no further action required.**
