Release Overview Bonzai Intranet 2.2.7

Aurea is happy to announce and provide release version 2.2.7 with 5 defect fixes.

Release Version	2.2.7
Release Date	02/22/2020
Deliverables	Release Notes Bonzai Intranet
	Deployment Package

Summary of Issues Fixed

Issues Fixed in v2.2.7

Detailed below are the fixes in this release:

Ticket	Description
BOINT-11217	Bonzai web parts not loading content on first load when ADFS is implemented.
BOINT-12054	'Sort by Date' on document portal is not working properly.
BOINT-13648	No space between the author label and the author name in the Event Card Author field for German translation.
BOINT-13824	Numeric values in search results are appearing as date values in Bonzai 2.0.
BOINT-8540	The Landing web part titles with the letters 'g' 'y' are displayed truncated in the bottom.

Known Issues

- There is a known inconsistency when defining a View Limit in the SharePoint Site Contents, and using pagination in the web part using that view.

- Web part configurations having a blank Site URL property currently assumes the value to be `*/*` (and try to retrieve the list and views from there), instead of the current site. To fix this, provide the Site url to web parts in their settings. (E.g. `/news_events/news, /news_events/news/departments` etc...).

System Requirements

Required software is noted below, with an emphasis on the following terms:

- **Certified** - this release was tested specifically against this configuration.
- **Supported** - this release was not tested against this specific configuration, though it remains supported as differences between it and the certified software are minimal or not applicable to Bonzai.

	Certified	Supported
