---

## Changes in this release

### Fixed issues

Here you can find the list of resolved issues specific to Bonzai Intranet 2.2.13.

<b>Ticket</b>	<b>Description</b>
BOINT-18180	The remote HTTPS server should be enforcing HTTP Strict Transport Security (HSTS)
BOINT-19251	The event start and end time should be displayed correctly in the search results webpart

## General notes about Bonzai Intranet behavior

Bonzai Intranet employs multiple third-party components and in some cases may be affected by how these components work. Here are some particular issues.

- You may see new items in the Term Store even without a cache key update in Brick if you clear your browser's cache or use a browser where the stored cache key is different from the Brick cache key.

---

## System requirements and supported platforms

The required software is noted below, with an emphasis on the following terms:

- **Certified** - this release was tested specifically against this configuration.
- **Supported** - this release was not tested against this specific configuration, though it remains supported as differences between it and the certified software are minimal or not applicable to Bonzai.

	<b>Certified</b>	<b>Supported</b>

## How to Install or Upgrade to This Release

The Bonzai team deployed 2.2.14 to our **CDN (Content Delivery Network)** on May 15, 2021, and republish the themes for 2.2 customers.

**Customers running 2.2.0 and above will automatically be updated to 2.2.14, with no further action required on their tenants/farms.**

Please contact [Professional Services](#) for more information on how we can help you upgrade to this release.
